About The Program

Our team will audit your network's insurance billing to identify errors and underpayments.

100% SUCCESS RATE

We have been successful in 100% of the healthcare billing audits we have conducted. Our team was able to find erroneous billing codes that resulted in underpayments to the hospital network.

100% CONTINGENCY BASED

Our services are offered at no out-of-pocket expense to our clients. We simply bill a percentage of the increased revenue we are able to claim on behalf of our healthcare clients. It's a win-win.

Getting started with our **Healthcare Audit Program**

WWW.COMFORTPROFIT.COM

CUSTOM SOFTWARE ALGORITHMS

Our team develops specific algorithms to analyze historical billing for each client. These algorithms can quickly identify code errors and underpayments from insurance companies.

ZERO BALANCE CLAIMS

We specifically look for and identify zero balance claims that are marked as "paid in full" in the billing system. This is where many underpayments occur from insurance providers.

PAID

revenue

10% - 20% INCREASE

Our average audits result in a 10% to 20% increase in revenue for our hospital clients. This revenue is paid directly to your group from the insurance company or provider.

Recent Case Studies

✓ **\$6,000,000**

123-bed Texas hospital: \$6 million in underpayments through BCBS alone.
